## Thousands of Children DISABLED, DISCHARGED, & HIDDEN FROM VIEW

After 5 years of Covid, millions remain chronically ill including many **teachers** and over 100,000 **children** (ONS). Many are housebound or bedbound and unable to attend school.

Long Covid can cause systemic damage affecting organs, the immune system and even the brain.

**Please help children and adults with Long Covid to  
RETURN TO THEIR DAILY LIVES, SCHOOL AND WORK.**

"I used to be healthy and go to school like everyone else. I used to ride horses and swim and play tennis and play with my friends. Now I spend my life in bed and I'm too sick to move. I have no friends anymore, I can't do my hobbies and I can't do any school. No doctor knows how to help me and for most of the time, none have even tried. Some of them even didn't believe me and said I was just lazy. I am abandoned and I've given up, honestly. I'm not the only one. I don't understand why no one will help us."

12-year-old - Long Covid since 2020.
